

## REMARKS

The Examiner has allowed all claims except for Claim 85, and subclaims dependent thereon. The Examiner states that the following phrase is unclear:

“wherein for locating the mobile station **M** in at least one location, at least one of said first and second geographical indications for **M** is dependent upon a delay time of a signal from ***at least one non-terrestrial wireless transmitter above*** and not supported on the Earth’s surface”.

Applicants have amended Claim 85 so that the word “above” is removed. Accordingly, Claim 85 now states:

“wherein for locating the mobile station **M** in at least one location, at least one of said first and second geographical indications for **M** is dependent upon a delay time of a signal from at least one non-terrestrial wireless transmitter, not supported on the Earth’s surface”.

It is now believed that Claim 85 is patentable, and accordingly, each of its dependent subclaims are now also patentable at least due to their dependence upon patentable Claim 85.

Applicants have also made very minor grammatical corrections in various claims which not believed to affect the patentability thereof.

Accordingly, since all claims are believed to be in condition for allowance, it is requested that the present application be reconsidered. It is believed that no fees are due with the current Amendment and Response as indicated in the introduction to this amendment since Applicant’s have not added any additional claims, and Applicants previously paid for the independent claims therein, and previously paid for 15 ***more*** total claims than are currently pending. If any other fees are due, the undersigned Applicant requests a phone call at 303-863-2975.

Date: April 5, 2009

Respectfully submitted,

By: /Dennis J. Dupray/
